

## Competition:

# Who knows the most vocational words?

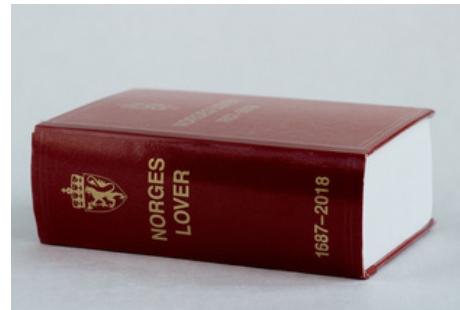

### Task:

- Form groups of 3-4 students.
- The youngest student selects a chapter from KLAR app, for example, Health and safety (HES).
- The youngest student (Student 1) starts with the first vocational word. The student should read the explanation, but not say the word. It's allowed to show the picture if the classmates want to see the picture.
- Student 2 gets to guess the first word. Student 3 gets to guess the second word. Student 4 gets to guess the third word. Then it's Student 2's turn to guess again, and so on.
- The first student to correctly guess five words wins!
- The competition can be repeated with other chapters in the app as well. Then, Student 2 will read the vocational words.

### An example:

**Student 1:** I start now. The first word (The Working Environment Act) is the law that ensures that the workers have good working conditions. Look at the picture. Student 2, guess first. What do you think the word is?

**Student 2:** The Working Environment Act?

**Student 1:** That's correct. Now, you have guessed one correct word. The next word (Deviation) is when something does not match what is normal or specific. Student 3, now it is your turn.

**Student 3:** Ehm... I don't know.

**Student 1:** Then, you don't get any points. The word was deviation. The next word (burden) is when something feels heavy physically and mentally. Student 4, it is your turn to guess.
